

ENVIRONMENTAL POLICY STATEMENT

It is the policy of Astrosyn International Technology Ltd to undertake its business in a manner which ensures the best protection to the general environment and with due consideration to the use of recyclable materials which enables the worlds resources to be naturally replenished.

Our objectives are to use materials which will not be harmful to the environment during their disposal and not to permit any employee to be subjected to hazardous conditions which could cause any hazard to the health and safety of employees.

Consideration will always be given to the environmental effects of the company's activities, products and services that may involve customers, users, the general public and employees.

The company is firmly committed to reducing the generation of waste material and the unnecessary consumption of fuel and energy during the normal course of business.

Where the company can influence the design of a product it will always consider ways to minimise the environmental effects in production, use and disposal of that product.

Suppliers to the company should be encouraged to use materials and products that are environmentally friendly and can be recycled economically.

This policy has been made known to all employees who are encouraged to identify and implement potential environmental improvements within the company and to make known any environmental innovations to executive management for consideration during a long term environmental planning of the business, with the goal to comply with the requirements of ISO14001.
